

Stories.coop

Stories.coop is the world's first global, digital campaign to spread the benefits of cooperation through the tradition of story-telling. Stories connect people through the power of words and the power of pictures. Stories tell the facts and they connect to our emotions, so your story of cooperation can make a lasting impact. Stories.coop delivers the UN's message "Cooperative enterprises build a better world" to the global public in International Year of Cooperatives 2012.
