

Business in the Community

We are a business-led charity focused on promoting responsible business practice. We have a growing [membership of over 850 companies](#) and a further 10,700 companies engaged in our campaigns globally. Our members help to transform communities by tackling key social and environmental issues and in doing so, transform themselves. Our vision is for every business to act responsibly and so ensure a sustainable future for all.

Responsible businesses don't just focus on the bottom line, they invest in people, products and services that meet future need – and do so without compromising long-term business, environmental and social sustainability.
